

Fachbereich Philosophie

Fachbereichskolloquium
Wintersemester 2015/16

18:15 bis 19:45, G 307

Im Rahmen des PHILOSOPHISCHEN KOLLOQUIUMS findet am
Donnerstag, 17. Dezember, folgender Vortrag statt:

Dr. Sophie Gibb
Durham University

Defending dualism

In the contemporary mental causation debate, two dualist models of psychophysical causal relevance have been proposed which entail that, although mental events are causally relevant in the physical domain, this is not in virtue of them causing any physical event. It is widely assumed that the principle of the causal completeness of the physical domain provides a general argument against interactive dualism. But, whether the completeness principle presents a problem for these alternative forms of interactive dualism is questionable. In this paper, focusing on the popular no-gap argument for the completeness principle, I explore one reason why.

Alle Interessierten, insbesondere auch Studierende, sind herzlich eingeladen.

nächster Vortrag 21.1.

Stephen French, University of Leeds

Modality in modern physics: Between humeanism and dispositionalism
