Perceptual Consciousness as a mental Activity

I argue that perceptual consciousness is the product of a mental activity. The mental activity in question is the activity of employing perceptual capacities, such as discriminatory, selective capacities. This is a radical view, but I hope to make it plausible. In arguing for this mental activist view, I reject orthodox views on which perceptual consciousness is analyzed in terms of (sensory awareness relations to) peculiar entities—be they phenomenal properties, external mind-independent properties, propositions, sense-data, qualia, or intentional objects.

Alle Interessierten, insbesondere auch Studierende, sind herzlich eingeladen.

nächster Vortrag im Wintersemester 2017/18
Wir wünschen allen eine erholsame vorlesungsfreie Zeit.
